ABRUZZI AND SOUTHERN RYE.

Are often planted in the spring for very quick grazing crop, and for later turning under for the benefit of the ground. The ABRUZZI RYE we offer is GENUINE ABRUZZI—no substitute. See page 23 for price and description.

SUDAN GRASS

In 1909 there was introduced into this country from Africa the SUDAN GRASS, which has now grown to be one of the greatest crops the farmer can plant. This grass yields several cuttings of fine hay, and grows so fast that it is amazing. A great crop; try some this year. See page 21 for prices.

LESPEDeza.

The demand for no seed has increased lately like that for Lespedeza or Japan Clover. Each year more farmers discover the immense value of this crop in grazing, in hay, in land building, and in money-making. See page 18 for description and prices.

SOY BEANS

The one crop that contains the best balanced ration of all is the SOY BEAN. It is wonderfully rich in food value, a great forage plant, easy to grow under varying conditions, and tremendously enriching to the soil. See page 17 for description and prices.

It is our **GREATEST SOIL ENRICHER, BEST STOCK FATTENER, FINEST CRUSHED FEED, and FINEST WEALTH MAKER.** Help yourself your land and your country by planting a large crop every year.

Early Speckled or 90 Day. This variety has almost entirely superseded the old style velvet, and on account of absolute certainty of maturity before frost, its abundance of vine, and the immense crop of beans, it is one of the very best to plant. Plant about 1 gallon per acre. Pt. 20c; Qt. 30c; Gal. 85c; postpaid. Not prepaid, Pk. 90c; Bu. \$2.50.

"Received my Tomato Plants; they were in fine condition. Yours truly, O. J. Valentine, Lumberton, Miss."

The New Osceola. One of the greatest velvet beans of them all. Has thin hulls, does not shatter out, immense long pods, great large beautiful speckled beans and is an excellent keeper. It is even earlier than the Early Speckled, produces as much vine, and is far and away ahead of any in the yield of seed. The most easily gathered of any, and above all they do not sting when being gathered. It will pay immensely to plant the OSCEOLA. Pt. 20c; Qt. 35c; Gal. 90c; postpaid. Not prepaid, Pk. \$1.00; Bushel, \$3.00. 5 Bu. \$2.75.

(4) the crop may be gathered and the beans picked off later if this plan is preferred. Averages 3 feet tall, branching and bearing near the ground, the pod clusters being decidedly longer than in other varieties. An occasional branch will run 5 to 7 feet, but shows no inclination to wrap corn. Seed have appearance of Early Speckled variety. Matures about the same time as the Early Speckled.
Plant alone in rows 3 to 3 1-2 feet wide, or in rows or alternate rows with corn, dropping seed 2 to 3 feet apart, cultivating about like cowpeas. We have the most reliable seed obtainable of this variety. Pkg. 10c; Pt. 25c; Qt. 40c; Gal. \$1.00, \$1.85; Bu. \$6.00. Ask prices. Pkg. 10c; Pt. 25c; Qt. 40c; Gal. \$1.00, postpaid. ARSENATE OF CALCIUM.

For cotton dusting against the boll weevil, and also for poisoning other plant insects. A scientific preparation of lime and arsenate powdered to an extreme degree of fineness. We offer only a Calcium Arsenate completely up to specifications found absolutely necessary for effectiveness in great numbers of government tests.

Conditions are so varied that absolute rules cannot be laid down governing the use of Calcium Arsenate, but generally speaking the cotton grower should be equipped to begin dusting just as soon as there averages 15 to 20 per cent of the squares punctured; about 5 lbs. should be used per acre; the interval between dustings should not be over 4 or 5 days; ordinarily about 4 dustings are required, 5 or 6 in very rainy weather; in case of hard rain within 24 hours after an application, another dusting is needed immediately; dusting should cease when plants set as many bolls as can mature; only adult weevils are poisoned, so the shorter intervals of dusting are extremely important so as to catch new crops of adults hatched out. (Get from the U. S. Dept. of Agriculture, free, Bulletin No. 875, "Cotton Boll Weevil Control by the Use of Poison.") Price 50c per lb. postpaid. Not prepaid about 35c per lb. Write us.
